### Japan's Expertise Shared at Taiwan's 1st Int'l Symposium on Disaster Education

Taiwan hosted an international symposium on disaster education for the first time last month, and attendees included experts from Japan. In recent years, a series of major earthquakes have wreaked havoc in Taiwan. This program takes a look at how the country is educating children about disaster preparedness, what challenges the program faces and what aspects of Japan's expertise could be helpful.

### Making Decisions When Lives Are at Stake: Education to Reduce Disaster Risk

During disasters, people often have to make crucial decisions even though there are no clear correct choices. You can't ensure your safety only by doing what you're told to do; you have to make decisions for yourself. But how can we improve our decision making skills? We take a look at a class taught at a junior high school.
